The microphone I use is the *Neumann TLM 103.* For my interface I use the *FocusRite Scarlet Solo 4th Gen.* I work in my home studio booth that is the silver series from VocalBooth.com and I work on an *Apple Macbook M5 Pro.* For my DAW (recording software) I use *Adobe Audition.*

being able to bring a character to life through my voice. I have been playing video games ever since I have been a little kid and the way my mom got me to walk was by hovering my brothers Nintendo 3DS above my head to get me to reach for it. I have always loved creating fictional characters and giving them their own voices and stories. My favorite video game is World of Warcraft and I am one of those people who reads EVERY quest and will read them out loud and act it out in the same way the character does. Thats when I realized: Wait.. someone is actually speaking for this character! I did research on it and immediately fell in love with voice acting and knew it's what I wanted to do.

I take great pride and I am so thankful to have the opportunity to be the voice for a character or company!

Thank you for taking the time to read my resume!

-Han Frye
